

CREDIT CARD DEFAULT PREDICATION

Wireframe documentation

Narayana Pagadala

- The web application for Credit Card Default Prediction has a single page, where the user

1. Enters inputs

2. Submits the inputs

3. The application displays the output, indicating whether the customer is likely to default the credit card payment in the following month.

Two types of data are entered

1. Demographic information

2. Behavioral information

All the information will be used to predict the results.
